## Flame-failure safety system

Thanks to Baumatic, when you purchase cooktops that have flame failure, you can enjoy complete peace of mind whilst you cook. Our flame failure safety system automatically cuts the gas supply should the flame be extinguished because of a strong current of air or liquid spillage. In effect, because we have devoted our time to ensuring your safety, you can devote your time to simply enjoying yourself in the kitchen.

## One-piece cooktop surface

Pressed from a single sheet of stainless steel, the Baumatic gas cooktop features a seamless one-piece hob design with built-in skirts and conveniently located front controls, making it aesthetically appealing, user friendly and easy to clean.

## Heavy-duty trivets

The innovative design of the trivets was inspired by a special study on the efficiency of professional kitchen appliances. Researchers found that heat can be more evenly distributed if you provide greater stability to the base of a saucepan.

## Automatic electronic ignition

In order to make the use of our products even easier, Baumatic have made sure that you only have to press down and turn the control knob for the hob to ignite. This simple way of igniting means that you do not have to fiddle with any extra buttons or waste time looking for matches.

# GAS COOKTOPS

## BHG690SS

### Baumatic 60cm Stainless Steel Gas Cooktop

Automatic electronic ignition  
Heavy-duty trivets  
Front control operation  
Flame failure  
Set up for natural gas with LPG jets supplied

#### Burner output

1 x 10.80 MJ/h rapid burner
