baumatic-wine-coolers](http://www.baumatic.co.nz/baumatic-wine-coolers)

Baumatic wine coolers are specially designed to keep wine at the perfect drinking temperature. All models have digital controls which allow you to set exactly the right temperature for long-term storage or short-term drinkability. A bottle of wine is always ready to drink, no matter what the occasion.

## **Built-in or freestanding**

All Baumatic wine coolers can be installed, built-in or freestanding and make great additions to a kitchen. They deliver equal performance and are sleek enough to fit under kitchen counters, out of the way of working spaces.

## **Dual zone**

Dual zone wine coolers have two separate compartments, each with their own controls, so you can store red and white wines at the correct temperatures.

# WINE COOLERS

## BWC150SS
